

Ancilla Partners is a web design and development firm with a focus on applications for the healthcare industry. Our clients are some of the healthcare quality improvement leaders in the country. The data tools and web sites that we build allow them to accomplish their goals.

Job Description

The successful candidate must have solid technical skills and experience in developing robust data-driven applications using Web development tools, object-oriented programming languages and techniques, database design and optimization tools and leading operating system and network platforms.

Ancilla Partners is looking for a Web Developer who is an intelligent, enthusiastic, independent, detail-oriented, self-motivated problem solver who is able to work with moderate supervision. The ideal candidate is passionate about doing great work and providing excellent service and support to our clients. You have the skills to hit the ground running right away and the desire to learn a lot more. You can manage your time efficiently and effectively while keeping your supervisors aware of your project status. You'll be working with a relatively young company that is at the forefront of healthcare quality improvement.

Key Technical Skills

- At least one modern programming languages/frameworks (e.g, Ruby on Rails, PHP, and .NET)
- Database experience (especially MySQL and SQL)
- HTML, DHTML, CSS

Key Characteristics

- At least 2 years of experience directly related to web software development
- The programmer must be able to create well-structured code and unit test it completely with moderate supervision
- Candidate must have the ability to develop applications with the end client in mind within estimated timelines
- This position requires good writing and communication skills
- Candidate ideally has a foundation in a modern application framework, as well as experience and skills in professional web development

Compensation & Benefits

We offer a casual work environment in the heart of the Third Ward, competitive salary and benefits, and the opportunity to help our clients improve the quality of healthcare in the United States.
